### **DETAILED ACTION**

1. Applicant's 5/13/10 Amendment, which directly amended claims 1 and 23, canceled claims 8, 9, 13, 27, and 28, and added new claims 39, and 40, is acknowledged.

#### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-6, 11, 12, 14, 21-25, and 30-40 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The new matter pertains to: a) "longitudinal central axis" of an outlet conduit recited, e.g., in claims 1 and 23; and b) "each angle between the central axis of the inlet conduit and the central axis of each of the outlet conduits less than 25°", as recited in claim 23."

As to matter a), the term, "longitudinal central axis" is not even recited or referenced in the as-filed specification. Also, the outlet conduits in the elected invention do not even have one, unique longitudinal axis (see section 4 below).

As to matter b), the as-filed specification does not disclose the elected invention (as shown in Figs. 5-7) as having the recited angular configuration for the outlet conduit.

3. Claims 1-6, 11, 12, 14, 21-25, and 30-40 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

There is neither an adequate description nor enabling disclosure for the new matter identified in section 2 above.

4. Claims 1-6, 11, 12, 14, 21-25, and 30-40 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims are vague, indefinite and incomplete and their metes and bounds cannot be determined because there is not support for the new matter identified in section 2 above.

Also, the elected embodiment as shown, e.g., in Fig. 7, shows not one but two longitudinal axes for outlet ducts 5,6. It is unclear: a) if applicant is referring to one of

these axes as the "longitudinal central axis"; and b) if such is the case, which of the two axes is the "longitudinal central axis." This ambiguity renders the claims vague and indefinite.

### ***Conclusion***

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
